

First of all thank you SO much for your amazing and generous help during A Night Beyond Limits Birmingham!! We were blown away by how amazing you are at what you do and what you achieved in such a short space of time! You really lifted the quality of the entire production and I know a highlight for many in attendance was truly how the lighting amplified the choreography! I know from my perspective, it really brought what I envisioned to life (which I don't get to say very often) so I am super grateful! It was definitely one of my favourite collaborative processes I've had so far when working with a light technician and it's very clear that you love what you do! It's truly refreshing to meet someone who is just as passionate about their art as I am and it's truly what I look for in our expanding team! I would recommend anyone to book you as their next light technician, designer, wizard extraordinaire hahaha! I know your calendar is about to be even busier than it probably is now so I would also tell people thinking of booking you 'don't walk....

RUN'!
